SUMMARY

Product Manager with 3+ years of experience building and shipping growth experiments hands-on, without waiting on engineering backlogs. Pioneered Rosetta Stone's first in-house A/B testing capability from scratch, partnering directly with engineers to define the framework and shipping changes that improved conversion from plan selection to checkout by 26%. Strong analytics fluency (Amplitude, GA4, SQL) and growing hands-on experience with AI tools — from directing AI-powered content generation at scale to prototyping directly in Gemini Canvas.

PROFESSIONAL EXPERIENCE

***Product Manager* | IXL Learning | San Mateo, CA | Aug 2023 – Present**

Began as part of an 18-month APM rotational program — Admin Analytics, Student Experience, and Education.com — before moving to lead the guest-discovery experience for Rosetta Stone's flagship consumer relaunch, a platform with 1M+ monthly site visitors and 340K signed-in users. Currently own the acquisition funnel, subscription management, Flashcards (a core learning feature), and internal support tooling; collaborating with engineering, design, and QA through Agile/Scrum sprints to drive new customer growth.

- **A/B Testing & Experimentation:** Pioneered the company's first in-house A/B testing capability, partnering with engineers to define and build the framework from scratch, and shipping changes that improved conversion from plan selection to checkout by 26%.
- **Growth & Conversion:** Led the top-of-funnel acquisition experience for Rosetta Stone's consumer subscription product relaunch (landing pages, checkout, and account creation), driving 14K paid subscribers and \$190k in MRR at a 42% trial-to-paid conversion rate within two months of launch.
- **AI-Powered Workflows:** Defined and directed AI-powered content generation across Rosetta Stone's Flashcards feature (300K+ assets) and 25 SEO landing pages (200+ assets), working hands-on with AI tools to generate written copy, images, and audio at scale.
- **Product Discoverability & UX:** Spearheaded redesign of Education.com's navigation, search, browse, and filtering across 38K resources, improving discoverability and increasing MAU by 23%.
- **Data & Analytics:** Built a set of 4 self-serve executive reporting dashboards, enabling CEO and C-suite with real-time visibility into revenue and growth performance.
- **0-to-1 Product Development:** Introduced a new revenue stream for Rosetta Stone by leading the 0-to-1 integration of Wyzant tutoring, coordinating engineering teams across both brands to link user data across two separate company databases.

***Product Management Intern* | Clearco | Toronto, ON | May 2022 – Aug 2022**

Led the research and integration of automated customer identity verification in Clearco's onboarding flow, reducing customer activation time by 47% and manual internal review time by 32%.

***Software Engineering Intern* | Royal Bank of Canada | Toronto, ON | May 2021 – Aug 2021**

Built front-end features for a patented, ML-driven cloud-optimization solution as part of a four-person team, conducting user interviews and designing the solution; delivered \$1.5M in annual savings.

***Business Analyst Intern* | Trulioo | Vancouver, BC | May 2020 – Dec 2020**

Improved KYC match rates by 14% on average for B2B clients through SQL analysis of hundreds of thousands of transactions. Reduced manual work by 75% by replacing Excel process with Python script.

EDUCATION

University of British Columbia, Canada

Bachelor of Commerce, Business and Computer Science Combined Major | May 2023
